WORK EXPERIENCE

Bajaj Finserv

Jan 2025 – Present

Senior Software Engineer

Pune, India

- **Distributed Cache Management Platform:** Designed and led development of an event-driven operational workflow platform using AWS Lambda, SQS, and Step Functions to automate cache management across distributed systems. Built governance controls that detected restricted-content URL categories and enforced approval-based cache purge workflows through automated email notifications and audit tracking. **Reduced manual operational effort by 99%**, improved deployment reliability, and **eliminated 4+ hours** of release-time coordination across teams managing **200K+ live pages**.
- Built custom CLI tooling and workflow automation to coordinate AI agent handoffs across isolated Git worktrees, enabling parallel development workflows, reducing context-switching overhead, and **accelerating feature execution and prototyping by 40%**.
- **CDN Content Delivery via NetStorage:** Implemented Akamai NetStorage-based deployment workflows to serve static assets directly from CDN, reducing load on AEM infrastructure and improving stability during high-traffic releases.

Bajaj Finserv

Jan 2023 – Jan 2025

Software Engineer

Pune, India

- **SSO Integration:** Designed and implemented secure Single Sign-On (SSO) across 3 partner applications using JWT and OAuth, improving user experience by eliminating repeated logins.
- **Scalable Backend APIs:** Developed high-performance REST APIs using Node.js, handling **20M+ daily requests** and supporting **50M+ monthly users**. Used SQL, Redis, Elasticsearch, MongoDB, and AWS S3 to build scalable and efficient backend systems.
- **Logging and Observability (ELK):** Set up centralized logging using Elasticsearch, Logstash, and Kibana (ELK), enabling structured log monitoring and faster debugging of production issues.

Atsuya Technologies Ltd.

Oct 2021 – Dec 2021

Machine Learning Intern

Chennai, India

- Developed and evaluated machine learning models for **time-series forecasting and anomaly detection**, generating alerts based on detected anomalies and integrated them into production workflows.

SKILLS

Languages: Python, JavaScript, TypeScript, Go, SQL

Backend & APIs: Node.js, Express.js, REST APIs, Microservices, Authentication & SSO

Cloud & Distributed Systems: AWS (Lambda, Step Functions, SQS, API Gateway, S3), Azure (Functions, Queues, API Management), Event-Driven Architecture, Queue-Based Systems

Databases, Caching & Search: SQL, Redis, MongoDB, Elasticsearch/OpenSearch, CDN Caching, Cache Invalidation Strategies

Infrastructure & Observability: Akamai CDN, NetStorage, AEM Dispatcher, ELK Stack, New Relic

Tools: Git, GitHub Actions, Copilot CLI, Claude, Ollama, Swagger, Postman

EDUCATION

Vellore Institute of Technology, Chennai

2019 – 2023

Bachelor of Technology in Computer Science (Spl in Artificial Intelligence & Machine Learning)

Chennai, India

- **CGPA:** 9.01 / 10

CERTIFICATIONS

AWS Certified Cloud Practitioner

June 2022

Amazon Web Services
